

# Amarillo

A spray-able / paint-able sticky adhesive to trap flying insects

# Duration / Application

## Duration of activity

Amarillo maintains its insect attraction and sticky-ness for several months depending on the insect density.

## Safety concerns

Amarillo is a water based product and does not contain organic solvents or pesticides.

## Easy to Apply

Amarillo can be applied by spraying, brushing or painting onto polyethylene sheets or any other smooth surface.

## Easy to renew

The sticky surface can be renewed at any time by spraying or painting over previous layers.

## Cover area

1 litre to cover 10 m<sup>2</sup>.

## Application

- Can be applied to any non-porous surface, i.e. Stretch nylon shrink between two pillars.
- The height should be in the upper third of the plants and up.
- Can be sprayed or painted. When applying Amarillo by spray, use jet nozzle TJet 8003. Sprayed at 100 cc / m<sup>2</sup>.
- Recommended to cover 5% of the area with Amarillo.
- After spraying, wash the spraying equipment with soap and water.

Depending on how quickly insects are trapped and the stickyness is reduced, a second coat can be easily reapplied over the previous coats.
